

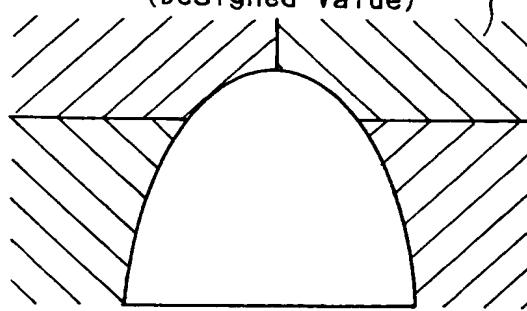

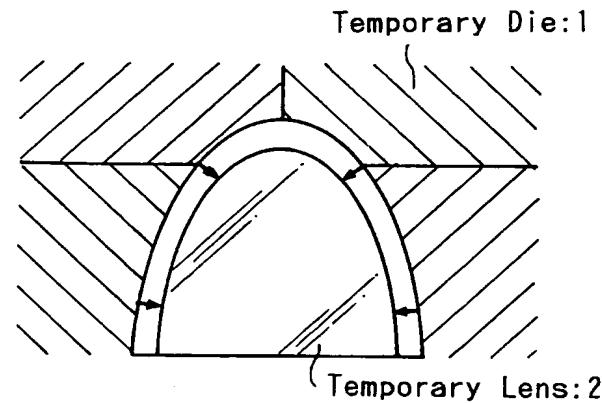

# FIG.1

(1) Optical Designing to yield 0 Wavefront Aberration

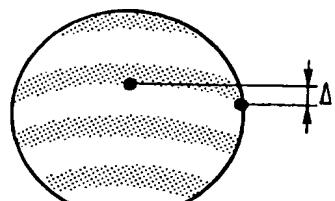

(2) Designing/Making of Temporary Die + Temporary Molding Temporary Die:1 (Designed Value)

(3) Measure Wavefront of Temporarily Molded Lens with Interferometer and Calculate Deviation of Wavefront (Wavefront Aberration Amount ( $\Delta$ )) from Reference Value

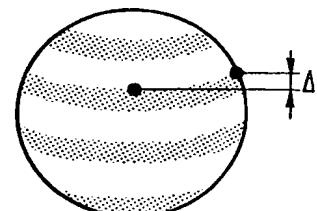

Interference Fringe

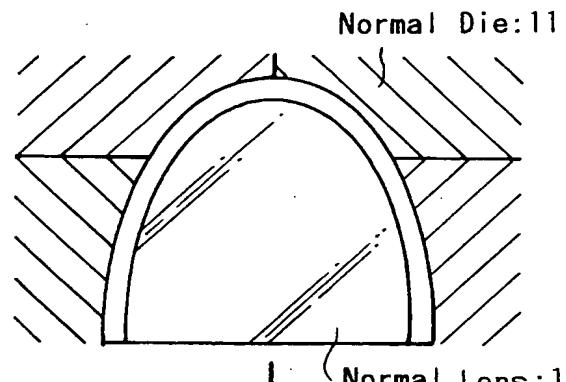

(4) Calculate Correction Wavefront Aberration Amount ( $-\Delta$ ) According to Calculated Wavefront Aberration Amount ( $\Delta$ )

Interference Fringe

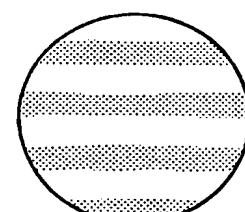

(5) Optically Design Lens to Generate Correction Wavefront Aberration Amount ( $-\Delta$ )

(6) Designing/Making of Normal Die + Final Molding

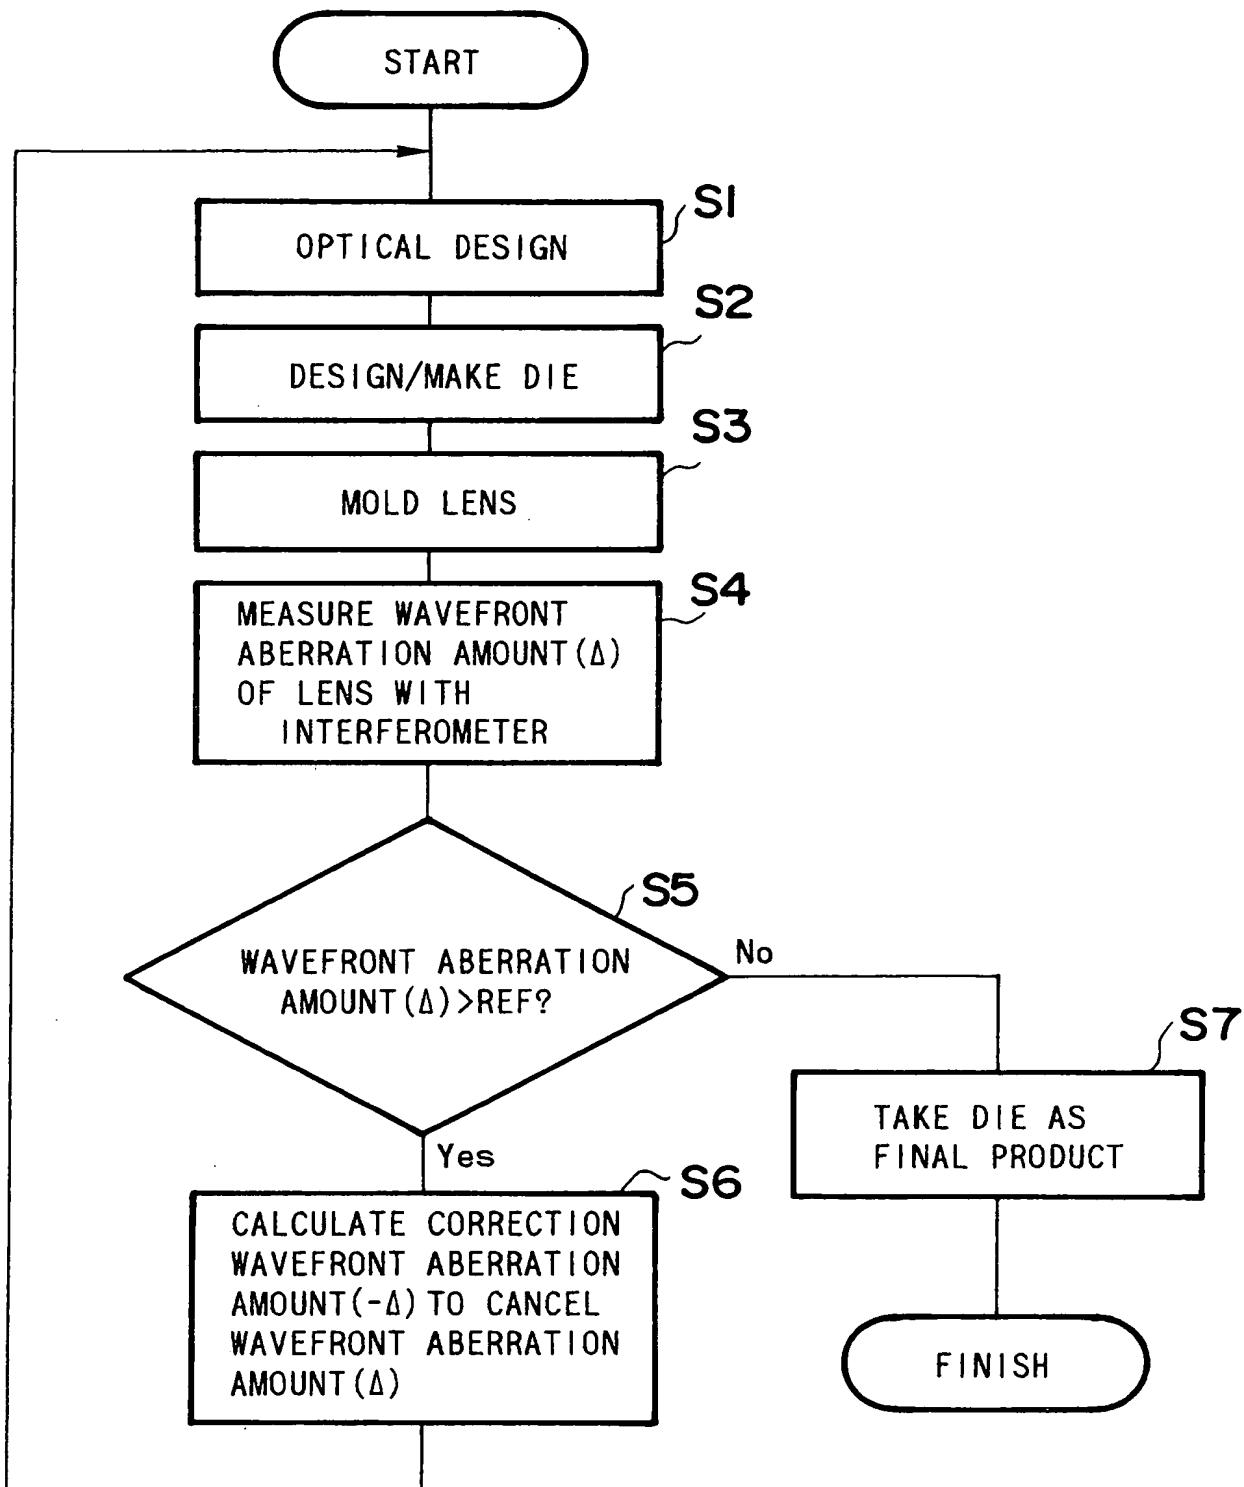

(7) Measure Wavefront of Finally Molded Lens with Interferometer

Interference Fringe
